## Profile Summary

Senior Software Engineer with over 6 years of experience specializing in full-stack web application development, with a strong foundation in UI engineering. Skilled in building high-quality, scalable applications using HTML5, CSS3, JavaScript, React.js, Angular, Node.js. Successfully led UI development for key products, resulting in measurable improvements in user engagement and product usability.

## Work Experience

**Nov 2024 - Present**

Senior Software Engineer

**SLK Software**

- Developed interactive and reusable UI components using React JS, leveraging custom hooks and modern React practices.
- Built dynamic forms using Formik with custom validation logic, and developed PDF localization features for highlighting extracted text accurately.
- Designed and developed configurable widgets to be embedded across various modules within the Enovia application.
- Built and managed Node.js REST APIs, using HTTP methods with proper status handling and authentication.
- Captured and stored API failure logs in Azure Blob Storage for efficient monitoring and debugging.
- Actively contributed to Agile development by tracking progress in Azure DevOps dashboards, working on sprint-based work items, and participating in planning sessions.

**Mar 2021 - Nov 2024**

UI Developer

**Immersion Software Labs Pvt Ltd**

- Developed dynamic and responsive front-end applications using Angular and React JS, adhering to modular and scalable architecture principles.
- Created reusable components and custom UI widgets to ensure consistent user experience across multiple projects.
- Integrated Stripe payment gateway for secure and seamless online payment processing, including handling tokens and webhooks.
- Integrated Node.js-based backend services with frontend applications using RESTful APIs, enhancing full-stack

development exposure.
- Collaborated with UX designers to convert Figma/Adobe XD designs into pixel-perfect and responsive web interfaces.
- Optimized frontend performance by applying lazy loading, code splitting, and state management best practices using Redux.
- Participated in Agile ceremonies, worked closely with cross-functional teams, and contributed to planning, code reviews, and release cycles.
- Ensured accessibility, mobile responsiveness, and cross-browser compatibility across all supported platforms using best UI practices.

### Jun 2019 - Mar 2021

UI Developer

**Signertech IT Solutions**

- Designed and implemented front-end features using HTML5, CSS3, JavaScript, and AJAX for dynamic content loading.
- Developed responsive designs compatible across devices and browsers (Chrome, Firefox, Safari).
- Used Git for version control and collaborated with backend developers on API integration.
- Migrated legacy UI components to modern web standards for better performance and maintainability.
- Created reusable CSS frameworks and contributed to internal documentation for UI design guidelines.

### Jul 2018 - Jun 2019

UI Developer

**Nevexa Digital Private Limited**

- Joined as a UI Developer Intern and contributed significantly to real-time projects, which led to an early transition into a paid role within the first month.
- Designed and implemented responsive UI layouts using HTML5, CSS3, and JavaScript based on client requirements.
- Collaborated with product teams to translate ideas into interactive, cross-browser compatible web interfaces.
- Created and maintained visual assets, ensuring consistent branding and user experience across web platforms.
- Supported quality assurance efforts by testing UI functionality and resolving layout and responsiveness issues across various devices.

## ⬡ STRENGTHS

**Analyze complex problems from multiple perspectives**

Facilitating effective communication and collaboration among team members with diverse backgrounds and expertise. Driving scalable and maintainable backend and frontend.
